## **SOLUTION How do you know when an equation has infinitely**

November 11th, 2018 - A system of equations has infinitely many solutions if there are infinitely many values of  $x$  and  $y$  that make both equations true A system of equations has no solution if there is no pair of an  $x$  value and a  $y$  value that make both equations true For examples suppose you have the system of equations  $y = 2x$  and  $y = x + 1$
